DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I, claims 1-20 and insulin-like growth factor binding protein 2 from claims 7-9 in the reply filed on May 7, 2010 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. In view of the amendment filed on May 7, 2010, restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group IA, claims 1-4, 9, 12-15, and 61-68, drawn to a method of profiling a tumor/cancer in a human tissue specimen wherein said profiling comprises assessing PTEN tumor suppressor gene mutations, deletions, aberrant or absent PTEN mRNA or PTEN protein.

Group IB, claims 1-4, 9, 12-15, and 18-20, drawn to a method of profiling a tumor/cancer in a human tissue specimen wherein said profiling comprises assessing, diagnosis or prognosis of PTEN-related signal transduction pathway and its responsiveness to said pathway modulators such as agonists or antagonists.

3. The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1634

Groups IA and IB do not relate to a single general inventive concept under PCT Rule 13.1 because they lack the same or corresponding special technical features. For example, assessing PTEN tumor suppressor gene mutations, deletions, aberrant or absent PTEN mRNA or PTEN protein in claim 1 of Group IA is not required for Group IB while assessing, diagnosis or prognosis of PTEN-related signal transduction pathway and its responsiveness to said pathway modulators such as agonists or antagonists in claim 1 of Group IB is not required for Group IA.

4. Specific Gene Election Requirement Applicable to Groups IA and IB

Note that, since claim 9 contains a lot of genes which have different structures and different functions, Group IA or IB is divided to many different subgroups each subgroup has a different gene, applicant is required to select a single gene for the examination. Applicant is advised that examination will be restricted to only elected gene and should not to be construed as a species election.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CAR § 1.6(d)). The CM Fax Center number is (571)273-8300.
